## The Research Process

### What's your INFORMATION problem?

Any time you want to know about something, you're going to need to do some research. Good research needs a good plan, whether it's just for a quick answer to something you wonder about or if it's for a major research project for a class assignment.

Learn how to plan your research, locate the best sources, and put it all together for a great presentation.

Use the [Research Planning Sheet](#) to map your own project as you go through this "How-To," or practice the skills using one of the examples given on the Research Examples sheet.

**Citing Sources** (based on MLA style)

[Click here to use Citation Maker](#)

Citing means stating exactly from where information and ideas come. Remember that citing your sources not only gives credit to the ideas of others, it adds veracity (truth) to your research and readings.

The following PDF files contain example citations for all types of sources, from books to online images. They show the most essential information to record as you go through the research process. All examples and documents found in "Citing Sources" follow **MLA style**. Download and print them for reference:

Print | Electronic/CD-ROM | Internet/Online DB | Miscellaneous

Besides the momentous task of creating exciting research, it is important to understand:

**When to Cite**  
**Plagiarism**  
**Paraphrasing Citations**  
**Quoting, Paraphrasing, and Summarizing**  
**Note Taking Skills**  
**Citation Worksheet**  
**General Guidelines for a "Works Cited"**  
**Report Writing Mechanics**

When the research is complete, it is imperative to create a clear and accurate Works Cited page. To simplify this often difficult and tedious task, OSLIS has devised a simple interactive **Citation Maker**. It includes the most common types of sources and is easy to use. For types of sources not included in Citation Maker, you may also use the following resources:

**Plagiarism**  
 What is plagiarism?  
 Plagiarism is the act of using another person's ideas or expressions in your writing without acknowledging the source. To plagiarize is to give the impression that you have written or thought of something that you have, in fact, borrowed from someone else. The Web makes it more tempting to plagiarize ideas because copying and pasting is so simple. However, the Web makes it easier for teachers to check particular and locating sources that

It is illegal, unethical, and failure for the course.

**Plagiarism can take several forms:**

- Copying any direct quotation without crediting your source
- Paraphrasing of a book or article without crediting the author
- Copying another person's work

**You may avoid plagiarism by:**

- Acknowledging borrowing material "According to Smith"
- Paraphrasing material

## About L-net

### Who am I talking to?

L-net is primarily staffed by librarians from all over Oregon.

You can learn more about who we are by looking at our [profiles](#).

There aren't any Oregon librarians online right now. Librarians outside of Oregon will be able to help you.

Evenings, weekends, and early mornings you will be connected to librarians all over the United States. You may also be connected to a librarian from outside Oregon if L-net is busy.

The person you are talking to may not be local, will still be able to help you with
